

Assignment #2

To successfully complete this assignment, you must complete the requirements below and receive a grade from your instructor.

Instructions

1. Research suggests many managers don't know how teams get their work done (Murty et al., 2021). Research also suggests that giving teams more autonomy doesn't always pay off (Boss et al., 2021). Read these two articles to learn more:
<https://hbr.org/2021/12/do-you-know-how-your-teams-get-work-done> and
<https://hbr.org/2021/12/when-autonomy-helps-team-performance-and-when-it-doesnt>.
2. Based on the readings, answer in a Word document (**500 word minimum**) how machine learning can help close the gap.
3. Save and close your Word document to your computer/cloud storage so it includes your last name: **Assignment2_Lastname.docx**
4. Remember to include APA citations for any references you have included.
5. When you are ready to submit, add your Word document to the Submission area (use the paperclip to browse for your completed file), upload, and click submit.
